**Lakestone**

**Bloodstone**

**Bluestone**

**Greenstone**

**Brownstone**

**Redstone**

**Sandstone**

**Granite**

**Custom Color\***

## Appearance

Light colors generally provide a brighter, airier environment than dark colors.

## Traffic & Abrasion

Wheel marks and dirt show up more on lighter colors than other choices. Abrasion is more visible on a dark floor than on a light one. Naturally, regular care and maintenance is required.

## Light

Generally, the darker the room, the lighter you may want the floor.

## Spillage

What is most commonly spilled on the floor? What color will obscure it best (or help highlight it the most)?

## Batch Variations

Variations in the resin, pigments and other raw materials cause slight variations in finished product from batch to batch. While colors are matched as closely as possible, C.A. Reed cannot guarantee that each new batch will precisely match its predecessor.
